Pseudocode

```
int count = 0;
int answer = 0;

foreach (integerOne in array)
{
      count = 0;
      foreach (integerTwo in array)
      {
            if(integerOne == integerTwo)
                  count++;
      }
      if(count == 1)
      {
            answer = integerOne;
            break;
      } else {
            continue;
      }
}
```
